DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a patch bag, classified in class 428, subclass 34.9.
 - II. Claims 8-21, drawn to a process for making a bag, classified in class 493.
2. The inventions are distinct, each from the other, for the following reasons: Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product(s) or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process can be used to make bags of materials which are not heat shrinkable and/or bags of non-olefinic materials.
3. Because these inventions are distinct for the reason(s) given above and have acquired a separate status in the art, as shown by their different classifications, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Rupert B. Hurley, Jr. on March 26, 1999 to request an oral election to the above restriction requirement, but no election was made.
5. Applicant is advised that a complete reply to this requirement to must include an election of the invention to be examined, even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that, upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
